

Contribution Statement

VerteX – Topic 4: Async Research Assistant

Repository: <https://github.com/yagubbx/Research-Assistant>

Target final tag: v1.0-final **Status:** Unsigned; actual contribution record required.

This statement follows the course template's ownership, co-ownership, review, commit-share and signature categories. PR 1 was merged by KhamiyevSebuhi (b56bd18), according to the supplied GitHub view. A merge alone does not establish code ownership or formal approval. Each member must enter their actual work below before signing. Commit shares must reflect the repository history and add to 100%.

AI tool disclosure. OpenAI Codex substantially drafted the application modules, tests, deployment configuration, report and presentation, and ran the recorded local checks. The supplied AI package was retained unchanged. Team review, edits and learning must be documented truthfully; this document does not assert that these actions have already occurred.

Attestation on signing. We affirm that the entries above accurately describe our contributions; commit shares represent real work rather than artificially split commits; we can defend the repository during the oral examination; and substantial AI assistance is disclosed. This attestation takes effect only when members complete and sign it.
